

Roundabout For the Intersection of Good Hope and Town Line

Waukesha County has selected a roundabout as the preferred alternative for this intersection. The proposed roundabout will provide for peak hour capacity improvements at the intersection, reduce delays on good Hope Road and reduce travel speeds on Townline Road.

The project will improve the sight distance for vehicles entering the intersection from the south and crossing through the intersection on Good Hope Road.

Intersection and roadside safety will be improved by removing trees from the right-of-way, restoring vision triangles and constructing roadside ditches.

Pedestrian and bicycle accommodations will be included as part of the project to improve the connection between the Bug Line Recreational Trail and Menomonee Park

Project Schedule

| | |
|----------------------|--------------------------|
| January – March 2011 | Right of Way Acquisition |
| February – May 2011 | Utility Relocations |
| April- August 2011 | Construction |
